

# 03 Environment

## The Smallest Footprint

We are committed to minimising our environmental impact and building operational resilience.

This year has seen continued progress on our climate agenda at the global and national level.

The G20 Financial Stability Board’s Task Force on Climate-related Financial Disclosures (TCFD) has released recommendations to help businesses disclose climate-related financial information. These recommendations are a significant step forward in the climate space and we are proud to be among the first companies globally to endorse the recommendations and commit to working progressively towards the reporting framework.

In Singapore, the Government has accelerated action with the announcement of the carbon tax and a mandatory electrical and electronic waste management system by 2021. It has also named 2018 the ‘Year of Climate Action’ for Singapore.

With our ongoing climate mitigation and adaptation roadmap as well as the adoption of Science Based Targets and implementation of our energy and carbon reduction programmes, we are preparing the Singtel Group to tackle climate related risks and opportunities as well as contribute to keeping global warming below the 2°C threshold.

For more details on our approach, please refer to our [website](#).
