

03 Environment

The Smallest Footprint

We are committed to minimising our environmental impact and building operational resilience to the effects of climate change for our business and the communities.

The Singtel Group Environment Strategy guides our focus on climate action and product stewardship (see Figure 1). More information is on our [website](#).

ADDRESSING CLIMATE CHANGE

CLIMATE CHANGE AND CARBON

Singapore named 2018 the 'Year of Climate Action' and 2019 the 'Year towards Zero Waste'. In October 2018, the Intergovernmental Panel on Climate Change (IPCC) Report targeted global warming to below 1.5 degrees Celsius by the end of the century, compared to the earlier 2 degrees Celsius. It forewarned disastrous consequences if the target is not met.

Singtel's journey in climate action and environmental sustainability began much earlier, as we recognised that it is not an overnight journey (see Figure 2 and Table 1).

We continue to adopt a holistic approach in addressing the threat of climate change through mitigation and adaptation efforts, focusing on improving our energy performance and efficiency measures, as well as building resilience across our operations.
